EDUCATION

Rajamangala University of Technology Phra Nakhon

2022 - 2026

B.S. in Computer Science

LANGUAGES

Thai (Native)

- Reading (Good)
- Writing (Good)
- Listening (Good)
- Speaking (Good)

English (B1)

- Reading (Good)
- Writing (Good)
- Listening (Good)
- Speaking (Passably)

PROJECTS EXPERIENCE (CLICK ON LINK)

- Integrating Line & Google Login API with Spring Boot App
 - github.com/thitikorn-nupan?tab=repositories&q=login-api
- Build apps (Spring Boot & Angular) manage Relations database m-t-m
 - github.com/thitikorn-nupan?tab=repositories&q=intermediary-services
- Build security APIs (Spring security for API uses JWT For user authentication)
 - github.com/thitikorn-nupan?tab=repositories&q=security-and-jwt
- Integrating free clouds service on apps (Spring could netflix & Angular)
 - github.com/thitikorn-nupan?tab=repositories&q=cloud-netflix-eureka
- Build APIs And Testing services & methods (Spring Mockito & Junit5)
 - github.com/thitikorn-nupan?tab=repositories&q=mockito-and-junit5
- Build APIs CRUD relations database (Spring Microservice concept)
 - github.com/Thitikorn-Nupan?tab=repositories&q=jdbc-microservices

INTERESTS

- Backend
- Fullstack
- Mobile (Android)

SOFTSKILLS

- Debugging
- Troubleshooting
- Attention to Quality
- Attention to Detail
- Logical Thinking
- Problem Solving
- Time Management

PROJECTS DEPLOYMENT

- Static website portfolio developed using Angular
 - thitikorn-nupan.com/app/portfolio
- Ecommerce it's mine senior project developed using Spring boot & Angular
 - thitikorn-nupan.com/app/ecommerce
- Review books it's project discuss about books using Spring boot & Angular
 - thitikorn-nupan.com/app/reviews-book
- Maintenance System it's project handle works using Spring boot & Angular
 - thitikorn-nupan.com/app/mentenance-system

(Login as Admin username : admin@outlook.co.th & password : 12345)

INTERNSHIP EXPERIENCE (G-Able 03/03/2025 - 30/11/2025)

- Worked on **Insurance Web Application**
 - **Maintenance and Create sub programs** on web application using techs as **Spring boot** for rest apis and **Angular** for user interface work with relation database **SQL Server** and use the **Git** version control for managing resource
 - **Maintenance & Add validation , Fix Defect** on application
 - **Comunicate** to BA about business then **Create the new sub programs**
 - **Convert UX** from figma to **UI application**
 - Create Rest APIs using **MVC** Design pattern on **Microservices achitecture**
 - Handler database **SQL Sever** on Relationships as **One to One , One to Many , Many to Many** and Apply to Rest APIs
 - Manage resource on **Git** as **Fix Conflict , Pull Code , Merge Code , ...**
